Working in the KRG Oil & Gas Services Sector

How to set up your oil services company in the Kurdistan Region

The Ministry of Natural Resources, Kurdistan Regional Government - Iraq (MNR KRG), welcomes both local and international oil and gas service companies to the region.

There are three major steps to setting up your company within the Region, and becoming a part of one of the most exciting and active oil and gas industries in the world.

1. Get registered at the Ministry of Natural Resources

➔ Submit your company profile to the MNR Registration Team electronically to registration@mnr.krg.org, and await approval. This should include:

- ✓ Capabilities and expertise
- ✓ Examples of previous work and experience
- ✓ General company information

➔ Following approval, you will receive the registration pack. Fill the forms in and return electronically to the MNR Registration Team.

2. Win your first contract and get licensed

➔ Once registered, you will receive invitations to tender directly from international oil companies. Apply and win a contract.

➔ Bring your signed contract with the operator to the MNR to get licensed.

3. Get your company registered with the KRG Ministry of Trade and Industry

➔ Once licensed, you will be able to register your company in the Kurdistan Region, with the KRG Ministry of Trade and Industry (MOTI). Hiring a lawyer to complete the process is highly advised. Contact the MNR Registration Team to provide you with a recommended list of local lawyers.

We wish you and your company every success in the Kurdistan Region.
